Carbon Literacy Project

'Relevant climate change learning for everyone.'

What is the course?

A unique global course that has been recognised by the UN at COP21, in Paris, where it was awarded as a TAP100, one of 100 worldwide Transformative Action Programs.

What is covered in the course?

The science behind climate change

What you can do to act on climate change

Social equity and climate change

Strategies and skills for communicating on climate change

Who will be leading the course?

Olivia Bennett who studied Environmental Science and Policy with Sustainability at University and has key interests in climate change, plastic pollution and creating a circular economy.

What is Carbon Literacy?

Carbon Literacy is a term used to describe an awareness of climate change, and the climate impacts of mankind's everyday actions. The term has had occasional use in scientific literature and casual usage but now is almost exclusively associated with The Carbon Literacy Project.

"An awareness of the carbon dioxide costs and impacts of everyday activities, and the ability and motivation to reduce emissions, on an individual, community and organisational basis."

Course details:

- 2 x 4 hour sessions totalling 8 hours of learning
- 4 hours in week 1
- 4 hours in week 2
- The course will take place at The Digital Greenhouse
- Carbon Literate Individual Certificate
- Cost: £300 per candidate

Carbon Literacy Project

Reviews

Carbon Literacy Project - Guernsey

The Carbon Literacy Training administered by Olivia was a **fantastic overview of the current climate crisis** and how it affects us on both a **global, and a local scale**. Olivia stripped it down to the basics making the course information **digestible, insightful, and inspiring**. Honest and open communication was encouraged within the group allowing us to learn from one another and share ideas. - *Emily Bush, Utmost*

I generally found the course beneficial to not only round out my knowledge on the impact of climate change, but also to **challenge myself to do more through commitment to additional action**. I also enjoyed the group, as it was a course filled with like minded people from a diverse range of industries – **led by someone who is passionate and knowledgeable about the impact of carbon emissions** on our climate and ecosystem and can talk about **local action to effect change**. - James Tracey, Oak Group

An outstanding course to learn about climate change in **bite sized pieces with lots of local information**.

Excellent relevant training for everyone!

It generates discussion and data so **individuals can make informed decisions**.

The subject was explained very clearly, using different methods, in an engaging manner.

A very **insightful and interactive** short course including interesting local statistics and information.
